SPECIFICATION SHEET

L.257452D	-	26	-	-	-	-	
MODEL #		WATT		LED	OPTICS	FINISH	VOLTAGE

DESCRIPTION:

Spotlight with UV-stabilized, epoxy-powder coated extruded aluminium body, and metal coated prisms reflector. Gulm comes with 26W LED spots with 1950lm (3000K) and 2200lm (4000K) luminous flux. LED screen in microprismatic polycarbonate. Great attention was paid to the LED spots connection technique. Thanks to the new connectors, spots are not fixed to the LED. They are screwed to the PBT base, thus granting higher mechanical stability, safer electric contact and protected diodes. The LED spots' electric connection is worth mentioning too. They are in fact not sealed to the entrance, but they are equipped with snap-in terminals that can be interchanged.
