PST - 6	<input type="radio"/> 7W PER FOOT	<input type="radio"/> Warm White(3000K) <input type="radio"/> Natural White(4100K) <input type="radio"/> Cool White(5000K)	Lengths are custom cut to your specification needs: up to a maximum of 8 feet(96"). *If longer lengths are required multiple units are joint together*	<input type="radio"/> Anodized Aluminum (matte)	<input type="radio"/> Non- Dimmable (ND) <input type="radio"/> Dimmable (D)	<input type="radio"/> 120V <input type="radio"/> 220V

DESCRIPTION:

Power Strip utilizes state of the art LED technology to provide a maintenance free lighting solution with the benefits of energy efficiency and reliability. The slim anodized aluminum housing is designed for simple installation and application versatility. It's clean industrial design and pristine finish complements any commercial, residential and museum environment. Cool beam, safe to the touch. No UV light emitted.

All Power Strip LED products can be supplied in custom lengths. There are three options for white LEDs: Warm white (3000K), Natural white (4100K) and Cool white (5000K).

HOUSING

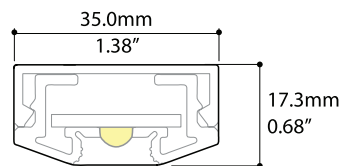

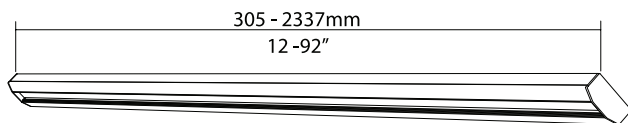

HOUSING	ANODIZED ALUMINUM CUSTOM LENGTHS
----------------	---

DESCRIPTION:

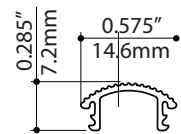

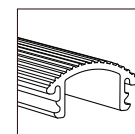

The aluminum Housing has been designed to house the Power Strip LED

The Power Strip shield is a clear, plastic, extruded cover for the Power Strip; it is designed to assist in creating an even light dispersion.
