DESCRIPTION:

POWER STRIP CLOSET: The Power Strip Closet system allows you to create an illuminated residential closet or an illuminated rack for a retail clothing store. The system is available with wall mount end caps and shelf brackets. The rod is available in clear anodized aluminum while the end caps and shelf brackets are matte nickel. All Power Strip Closet LED products can be supplied in custom lengths. There are three options for white LEDs: Warm white (3000K), Natural white (4100K) and Cool white (5000K).

HOUSING

DESCRIPTION:

The aluminum Housing has been designed to house the LED. The shield is a clear, plastic, extruded cover for the Power Strip Closet LED, it is designed to assist in creating an even light description.
