

25°™ WALL

Wall Sconces

TYPE:

PROJECT NAME:

design by Alain Monnens

The '25°' is a wall and ceiling surface mounted fixture. Its form originates from well considered 25° cuts into quadratic aluminum tubes. The position of the bulb in the wall fixtures is discretely hidden so that the light is diffuse and projected on the wall in different angles. When multiple fixtures are combined an appealing and playful atmosphere is inevitable. All versions are 360° rotating and the spot is 30° orientable. Available in white, black and grey paint or brushed aluminium. Light sources for the wall fixtures are G9 halogen or LED and for the spot.
