

CLARA™ CEILING

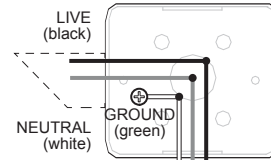

INSTALLATION INSTRUCTIONS

TYPE:

PROJECT NAME:

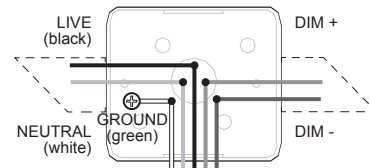

DIMMING (LTE) TRIAC/ELV (120V ONLY)

FIXTURE CABLES

DIMMING 0-10V 120-277V

FIXTURE CABLES

ASSEMBLY INSTRUCTIONS

1. Turn off the power.
2. Use the screws (A) to fix the mounting holder to the ceiling junction box.
3. Connect the 120-277V power to the driver. Remember to ground (electrical wiring diagrams on this page).
4. Connect the connector.
5. Place the LED plate in the mounting holder.
6. Put on a lampshade.
7. Turn on the power.

* **NOTE:** Before fitting the mounting bracket, remove it from the luminaire.

* The enclosed tool kit is designed for solid materials (solid brick, wood, concrete, aerated concrete) and gypsum board surfaces. The dowel should be properly matched to the mounting surface. Proper use of the dowel affects the safety and strength of the structure.
