

DIOGENE™

FLOOR

TYPE:

PROJECT NAME:

Its shape reminisces that of ancient lanterns, but Diogene reinterprets the golden rules of design with sleek lines and a contemporary spirit. It is an eclectic table, floor or ceiling lamp: a simple clasp or cord supplied in the pack can be used to attach it to a support structure. Diogene witnesses the birth of a new poetic aspect of functionality, brimming with unexpected facets and expressions: its flat surface can be turned into a small table. Ideal for both indoor and outdoor use, its light philosophy makes any space totally unique.
