TYPE:

PROJECT NAME:

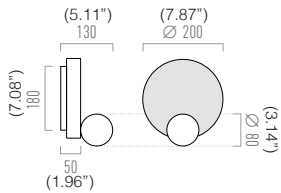

Offset luminaires are made of two elements - a cylinder and a ball. Asymmetrical displacement of one of these solids relative to the symmetry axis of the composition makes the lamps have a surprising and unusual form. It is a slight disturbance of symmetry that makes the whole series extremely interesting and provokes the creation of unusual arrangements - individually and in groups.

FINISHES:

- 002 Black
- 060 Snow White
- 003 White
- 006 Graphite
- 101 Gray
