

# SLIDE™

Table/Floor

**TYPE:**

**PROJECT NAME:**

design by Peter Van de Water

Slide is a table lamp with a clear and communicative design. One glance at the design is enough to tell you how to adjust it. The aluminum base and natural oak components form a triangle with slots that make it easy to slide elements and adjust the lamp's height and position. From low and pressed to high and slender, this table lamp is ideal for work environments and home offices.
