

Use of the luminaire by switch-activated plug or other system.

Thanks to the use of permanent memory microprocessor, it is possible to turn the lamp on and off by any wall switch, including 2 GANG switching.

If you switch the lamp off by a wall plug, you will put the light on again only by means of the wall plug itself.

If you switch the lamp off by the push-button, you will put the light on again only by means of the push-button itself.

ATTENTION !

The connectors 4 and 5 must be connected at the device A BEFORE connect plug 6 at the power supply.

DO NOT disconnect the connector 4 with the plug 6 connected.
